

For the Road Star its an Ilco blank #X248 or #YM63. It's an all brass chrome plated blank. There is no aftermarket with the black rubber head that I'm aware of.

Footnote by Joe Friday... For those who have more than one Yamaha scoot that uses the same key blank. The keys have the same pattern on both sides, but the locks only have tumblers on one side. This way the key will work witch ever way it's inserted. Here's the trick, cut one key pattern on one side, cut the "other" pattern on the other side. One key will then fit two different scoots...
